

ONE STOP SHOP FOR SPECIALITY CHEMICALS, ADDITIVES, RESINS, PIGMENTS FOR PAINT, COATING, SEALANT, ADHESIVE, PRINTING INK AND CONSTRUCTION INDUSTRY

Kusumoto Chemicals, Ltd.
DISPARLON NAMLON

Disparlon AQ -501/AQ 7503/AQ 7533, Defoaming/Antipopping agent based on blend of Vinyl Polymer and Surfactants for Water borne system.

Disparlon AQX 60/AQX 61, Co-solvent free Rheology control agent for water-borne system.

Disparlon 3500, Solvent-less Thixotrope based on Polyether phosphates for inorganic Zinc rich paints.

Disparlon PFA 231/ PFA 250, Thixotropic agent, Aromatic solvent free.

Disparlon KS 273N/KS 873N, Anti Flooding /Flocculation agent based on high molecular weight surfactants and pigment stabilizer for Solvent borne systems.

Disparlon OX 60, Defoaming/Anti popping, a Surface control agent based on Acrylic Polymer for Solvent based systems.

Disparlon UVX 189, Defoaming agent based on Vinyl Polymer for UV-cured coating, Non Solvent based paint system.

Disparlon UVX 272, Flow, Wetting and Leveling agent based on Acrylic Silicone co-polymer for UV-cured Coatings.

Disparlon 1952, Silicone free, high molecular weight surface active agent Defoaming and Leveling for solvent based coatings.

Disparlon L 1984N/LC 400, Acrylic Polymer based Leveling/ Anti-cratering/Wetting agent for Solvent-borne system, UV-cured system.

Negami Chemical Industrial Co., Ltd.

ART PEARL: Polyurethane Micro-beads, Spherical cross linked fine particle polymer used in area which requires excellent flexibility, toughness, low temperature stability, scratch resistance and Excellent weather resistance, **MAIN APPLICATION**: Matting or Touch modifying agent for coatings, functional coloring agent, surface modifier for synthetic leather, Anti blocking agent for films and light diffusion agent.

HAKUSUI TECH CO., LTD.

OSAKA GAS CHEMICALS

Agents & Distributors :

**UNIQUE
ENTERPRISES**

6, Tapasya, G.M. Road, Opp. Shoppers Stop, Chembur, Mumbai-400 089.
Phone : +91.22.2525 5074 / 2525 2908 / 80973 23333
Fax : +91.22.2525 6527 E-mail:info@uniqueenterprises.co.in

**CHE® COAT
CHE® BOND**

CHE COAT VT 42P/52P : Non-ionic Polyurethane based Rheology Modifiers with Pseudoplastic behavior.

CHE BOND DF 200 P/300 P: Powder type foam control agents for plaster, putties, fillers, gypsum, mortars and cement.

CHE BOND AS 1100/AS 1200 : Powder type Anti shrink Additives based on Alkyl Glycol and non ionic surfactants.

CHE COAT LNFA4 : Corrosion Inhibitor, Anti Flash Rust additives for Water borne systems.

CHE COAT DF : Defoamers based on Mineral oil / Glycol and Silicon Chemistry for Paint Coating and Food Industry.

EPICLON®

1K Water borne Epoxy RESIN 1K Solvent borne Epoxy RESIN

- Excellent corrosion resistance
- Excellent Adhesion to metals
- Easy to handle (no curing agent needed)
- Application in Industrial Coating, Automotive parts, 3C Primer, Marine.

ART RESIN: Urethane Acrylate oligomers and reactive urethane polymer used in EB, UV, viable light, room temperature curing type resin modifier. The cured material can be constructed from rubber like to high cured material. It can be used for plastic which cannot be heated, **MAIN APPLICATION**: Adhesive, Hard Coat, Potting, sealing, dental materials.

ZnO23KT : Antistatic agent, Improves stability of electrical conductivity by adding in conductive fillers.

DONACARBO

Coal tar pitch based carbon fiber, available in various forms.

MAIN APPLICATION: Additives for thermosetting resin, Additives for cement and mortar reinforcement, Antistatic application, Corrosion resistance, Additives in conductive paints
